New Features in Brief

New Features in Detail

fantastic new features that add
value to our top selling banners...

The new Original 2 and 3 are revisions to an already popular banner range. They have universal top rail systems and a new 'Quick Change Slider' fixing on the banners leader which makes it easy to apply or change graphics. The heavy, solid base now has new endcaps and adjustable feet to improve stability on uneven floors.

Should you require a double sided version, the Original 3 is available with an optional second roller. Both of these banners are available in a range of sizes 600mm to 2000mm, as well as custom sizes. (maximum of 2400mm).

The Original banners now have a re-designed padded carry bag, which allows easy/comfortable transport from your car to your display area.

These systems give a cost effective banner solution - widely used by designers as their roller banner of choice for important advertising events.
